

WHAT IS CLAIMED IS:

1. A pharmaceutical composition for treatment and/or prevention of a disease, a disorder and/or a condition caused by expression of a gene controlled by NF- κ B or ets, the composition comprising:

at least one decoy; and
a pharmaceutically acceptable carrier.

2. A composition according to claim 1, wherein the at least one decoy is an NF- κ B decoy or a derivative, variant or fragment thereof, and the derivative, variant or fragment thereof has biological activity.

3. A composition according to claim 1, wherein the at least one decoy is an NF- κ B decoy.

4. A composition according to claim 1, wherein the at least one decoy is an ets decoy.

5. A composition according to claim 1, wherein the at least one decoy is a chimera decoy of NF- κ B and ets.

6. A composition according to claim 1, wherein the disease is cerebral aneurysm, cancer, Marfan's syndrome, aortic detachment, post-angioplasty restenosis, chronic articular rheumatism, asthma, atopic dermatitis, nephritis, renal failure, or plaque rupture.

7. A composition according to claim 1, wherein the pharmaceutically acceptable carrier is a hydrophilic polymer.

8. A composition according to claim 1, wherein the pharmaceutically acceptable carrier is a liposome.

9. A pharmaceutical composition for treatment and/or prevention of a disease, a disorder and/or a condition caused by eosinophilic abnormality, the composition comprising:
at least one decoy; and
a pharmaceutically acceptable carrier.

10. A composition according to claim 9, wherein the at least one decoy is an NF- κ B decoy or a derivative, variant or fragment thereof, and the derivative, variant or fragment thereof has biological activity.

11. A composition according to claim 9, wherein the at least one decoy is an NF- κ B decoy.

12. A composition according to claim 9, wherein the at least one decoy is an ets decoy.

13. A composition according to claim 9, wherein the at least one decoy are an NF- κ B decoy and an ets chimera decoy.

14. A composition according to claim 9, wherein the disease is selected from the group consisting of asthma, allergic diseases, skin diseases, and mycosis.

15. A composition according to claim 9, wherein the disease is selected from the group consisting of bronchial asthma, childhood asthma, allergic asthma, atopic asthma, steroid-resistant asthma (SRA), non-allergic asthma, intrinsic asthma, extrinsic asthma, aspirin-induced asthma, cardiac asthma, and infectious asthma.

16. A composition according to claim 9, wherein the pharmaceutically acceptable carrier is a hydrophilic polymer.

17. A composition according to claim 9, wherein the pharmaceutically acceptable carrier is a liposome.
